

Here are some photos of Fred and Leslie Rau having fun at the Portland Rose Parade!

Rules for a float is that all surfaces must be covered with organic material. Hence, the Buick disappears. Look closely! There's a '48 Roadmaster in there somewhere.

Weather was cool and Fred had recently installed an auxiliary fan to help keep the car cool, but the snail's pace and all that insulating covering can make it really hard to keep things from heating up under the hood.
